🏥 DESIGN SYSTEM V1.0

ClinicOS Design Document

A comprehensive visual specification for developers and designers, derived from the Pomegranate Health reference aesthetic — adapted for a clinic management platform.

REFERENCE SITE	PRIMARY FONT	BODY FONT	BASE GRID
Pomegranate Health	Fredoka	DM Sans	8px

BORDER RADIUS
Heavily rounded

1 Color Palette

Extraction method: Colors were sampled directly from the Pomegranate Health reference screenshots using visual analysis of the navigation gradient, background surfaces, interactive elements, and data visualization components. The palette is warm-toned, dominated by a rich crimson-to-maroon range, grounded by a distinctive cream background.

Primary — Crimson Scale

Gradients

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

Nav / Header Gradient ★

`linear-gradient(160deg, #D95570 0%, #A02040 55%, #4E0E20 100%)`

Footer / Hero Dark

`linear-gradient(180deg, #C43055 0%, #8C1A32 100%)`

Cream Section Background

`linear-gradient(135deg, #F5EDD8 0%, #EDE3C8 100%)`

Hero Content Glow

`radial-gradient(ellipse at 60% 40%, rgba(240,192,48,0.3) 0%, rgba(196,48,85,0.15) 50%, transparent 80%), #F5EDD8`

2 Typography

Font pairing rationale: The reference site uses a distinctive chunky, rounded display font for all branding and headlines — visually identified as very close to **Fredoka** (rounded, bold, approachable). Body copy uses a clean, highly legible sans-serif, closest match being **DM Sans**. This pairing creates the signature "friendly but professional" tension the brand needs.

DISPLAY / HEADINGS — FREDOKA

ClinicOS

Use: badges, status labels, nav links

SUBSCRIPTIONS, NOT PREMIUMS · TOKEN ISSUED · WAITING

Caption / Micro

`DM Sans` `11px` `500`

Use: timestamps, metadata, hints

Last visit: Jan 15, 2025 · Dr. Sharma · 3 previous visits

Typography Rules

PROPERTY	RULE	RATIONALE
Line Height — Body	`1.6 – 1.7`	Generous leading for medical/dense content readability
Line Height — Display	`1.0 – 1.15`	Tight for impact; Fredoka's rounded forms need less leading
Letter Spacing — Labels	`0.06em – 0.1em`	All-caps UI labels need tracking to improve legibility
Letter Spacing — Headlines	`-0.01em to 0`	Fredoka naturally spaced; slight tightening at large sizes
Max Line Length	`60 – 70 characters`	Optimal reading measure for body paragraphs
Font Smoothing	`-webkit-font-smoothing: antialiased`	Renders Fredoka's thick strokes smoothly on retina displays

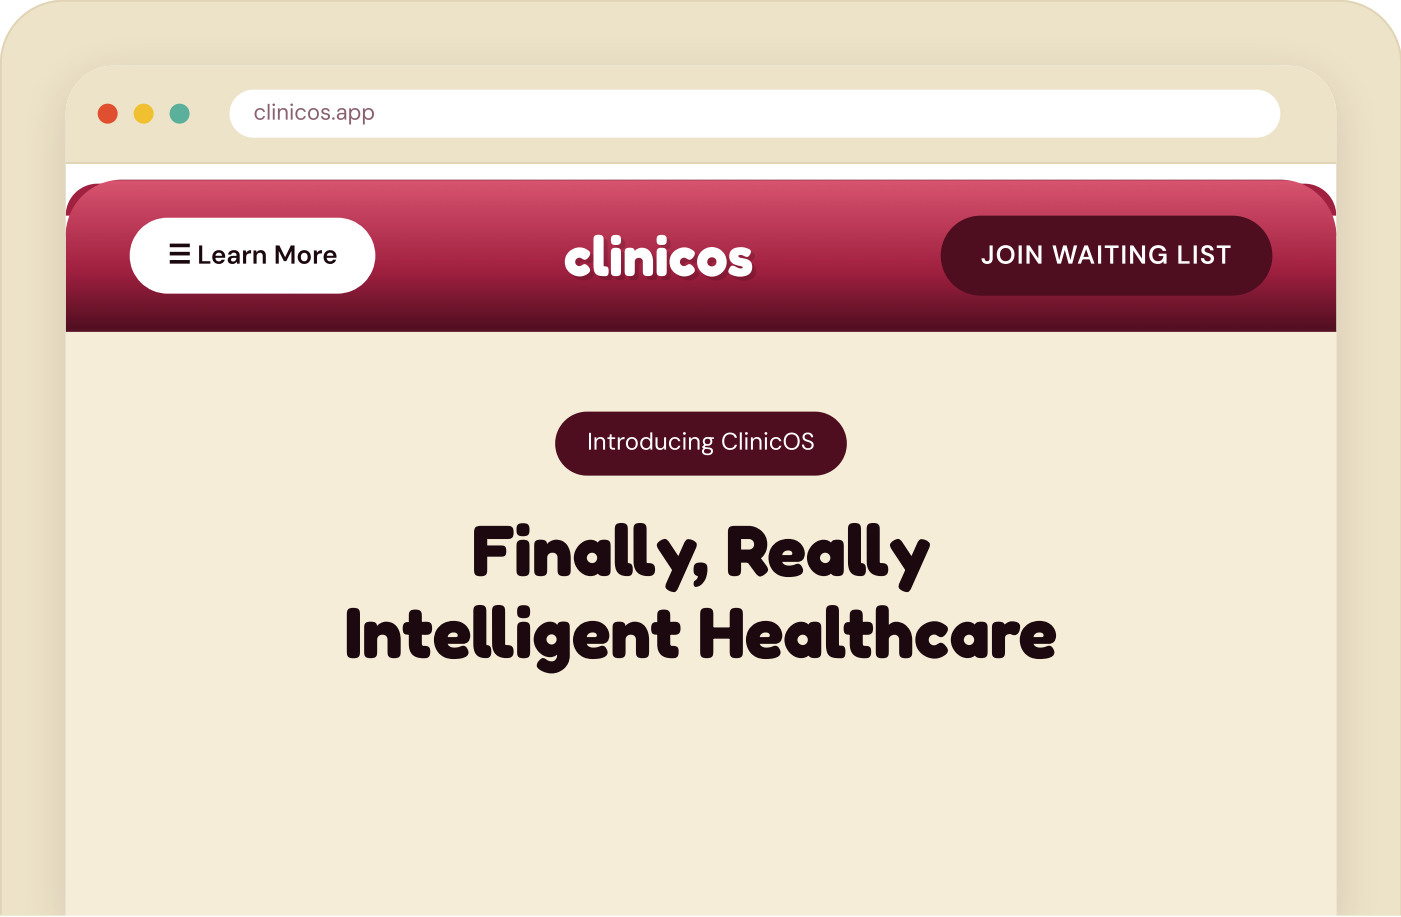
Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

PROPERTY	RULE	RATIONALE
Numeric Rendering	`font-variant-numeric: tabular-nums`	Required for all dashboard stat numbers to align correctly

3 Layout Structure & Grid System

Navigation — Signature Layered Header

The most distinctive layout element of the reference site is the **multi-layer header effect** — the navigation appears as a rounded card sitting on top of two progressively darker, slightly offset bands. This creates a sense of physical depth, as if the nav is a card floating above the page. This must be faithfully replicated for ClinicOS.



Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

Subscription-based clinic management, because paper tokens are out of touch, out of date, and out of time.

Grid System

← margin →	Content Area (max 1100px)	← margin →

BREAKPOINT	MAX WIDTH	GUTTER	MARGINS	COLUMNS
Mobile	`100%`	`16px`	`20px`	4
Tablet	`768px`	`24px`	`40px`	8
Desktop	`1100px`	`32px`	`auto`	12
Wide	`1280px`	`32px`	`auto`	12

Page Section Anatomy

Section Label PILL BADGE

A small outlined pill above every major section heading. Contains 2–4 words. Style: `border: 1.5px solid`, `border-radius: 100px`, `font-size: 13px`, `padding: 5px 14px`.

Example: "Subscriptions, not premiums" / "By the Really Intelligent people"

Section Heading H2 / H3

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

Always `Fredoka` bold. Two-line headlines preferred for impact. Max width: `640px`. Colour: `#1C0910` on cream background; `#FFFFFF` on dark/crimson background.

Section Body DM SANS

`DM Sans` 16–18px regular. Max width: `560px`. Colour: `#5C3040`. Line height: `1.65`. Sections alternate: text-left + visual-right, then visual-left + text-right (zigzag layout).

SECTION TYPE	VERTICAL PADDING	BACKGROUND	NOTES
Public / Hero	`120px top, 80px bottom`	Cream `#F5EDD8`	Full-width; phones/screenshots centered
Feature (light)	`80px top/bottom`	Cream `#F5EDD8`	Text + visual, alternating sides
Feature (dark)	`80px top/bottom`	Crimson gradient	White text; rounded corners top only
Stats / Data	`64px top/bottom`	White or `#FDFAF4`	Dense card grid; max 4 cols
CTA / Footer	`64px top/bottom`	Crimson `#C43055`	Centered; yellow CTA button

5 Visual Mood & Aesthetic

💊

Warm & Caring

Not cold clinical blue. The warm crimson-cream palette signals that ClinicOS cares about people, not just processes. Healthcare can be warm.

🎠

Playfully Professional

Fredoka's rounded letterforms, pill buttons, and friendly card shapes make complex clinic operations feel approachable. Fun, but not frivolous.

⚡

Fast & Confident

Bold typography at large sizes, strong crimson colour blocking, and generous white space communicate decisiveness. This software is quick and certain.

🌙

Depth & Substance

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

The multi-layer header, card shadows, and color gradient depth system create a sense that this product has real substance beneath its friendly surface.

Moments of Delight

The yellow CTA against crimson, rainbow chart arcs, colored avatar gradients — surprising pops of color that reward attention and create memorable moments.

Mobile Native

Phone mockups as hero visuals. Touch-friendly 48px min tap targets. Everything feels designed for a finger first, a mouse second.

Design Principles

01

Rounded Over Sharp

Every element — buttons, cards, inputs, avatars, even the page itself — has generous border-radius. Minimum 12px; maximum 100px (pill). The roundness communicates safety, friendliness, and approachability. Sharp corners are a last resort for data tables only.

02

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

Warm Backgrounds, Never Cold

The cream palette (#F5EDD8, #EDE3C8) is non-negotiable. Never use grey or pure white as a main background. The warmth is what differentiates ClinicOS from generic SaaS dashboards. It also reduces eye strain in clinic environments where screens are on all day.

03

Depth Through Layering

The signature layered header with progressively darker bands behind the main nav creates physical depth. This principle extends to all overlapping elements: cards cast subtle shadows, modals lift from the page, dropdowns float. Never flat when depth adds meaning.

04

Fredoka for Headlines, Always

The brand personality lives in the display font. Every headline, number, token badge, and logo uses Fredoka. It must never be mixed with another display font. DM Sans handles all UI copy and body text — these two fonts must never cross their domains.

05

One Strong CTA Per Screen

Following the reference site exactly — there is one primary action per screen. On dark backgrounds it's the yellow button. On light backgrounds it's the dark maroon button. Multiple primary CTAs compete and cancel each other. One wins; the rest are secondary or ghost.

06

Numbers Are Heroes

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

In clinic dashboards, numbers matter most. Patients seen: 47. Revenue: ₹12,450. Wait time: 23 mins. These numbers should be displayed in Fredoka at the largest possible size, with supporting context in small DM Sans below. Make the number the first thing the eye lands on.

Do & Don't

✓ DO

Use warm cream backgrounds (#F5EDD8) as the default page surface

Use Fredoka for all headings, numbers, and the logo

Round everything generously — minimum 12px radius on any card or input

Use the layered header effect on the navigation at all times

Keep section labels as outlined pills above every major heading

Use the yellow CTA (#F0C030) for the single most important action on dark sections

Give cards generous shadow and clear visual hierarchy inside them

Show phone mockups of the app UI in hero and feature sections

✗ DON'T

Use grey or cool-tone backgrounds — they break the warm, caring aesthetic

Use Inter, Roboto, or system fonts for headlines — only Fredoka

Use sharp corners (0px radius) on any interactive element or card

Use purple gradients on white — generic SaaS look that conflicts with this brand

Use more than one primary CTA on the same screen section

Mix too many accent colors in one section — max 2 accent colors per component

Use clinical blue as the primary brand color — reserved for info states only

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

Display small body text on the crimson background — maintain 4.5:1 contrast ratio

6 Spacing & Sizing Guidelines

8px Base Grid — Spacing Scale

`--sp-1`	4px	Micro gap, icon spacing
`--sp-2`	8px	Tight element spacing
`--sp-3`	12px	Small padding, badge gaps
`--sp-4`	16px	Default gap, row padding
`--sp-5`	20px	Card internal padding (compact)
`--sp-6`	24px	Card padding (standard)
`--sp-8`	32px	Card padding (large), grid gap
`--sp-10`	40px	Between sections (compact)
`--sp-12`	48px	Component group spacing
`--sp-16`	64px	Section padding (standard)
`--sp-20`	80px	Major section vertical padding
`--sp-24`	96px	Hero section top padding
`--sp-32`	128px	Hero / landing section full padding

Border Radius Scale

--radius-sm	--radius-md	--radius-lg	--radius-xl	--radius-2xl	--radius-pill
8px	16px	24px	32px	48px	100px

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

TOKEN	VALUE	USED FOR
--radius-sm	`8px`	Table rows, small chips, code tags
--radius-md	`16px`	Input fields, dropdown menus, small cards, metric cards
--radius-lg	`24px`	Standard cards, stat cards, modals
--radius-xl	`32px`	Large feature cards, patient profile cards
--radius-2xl	`48px`	Navigation, hero section containers
--radius-pill	`100px`	All buttons, badges, pills, phone lookup input

Shadow System

TOKEN	VALUE	USED FOR
--shadow-sm	`0 2px 8px rgba(30,9,16,0.08)`	Subtle elevation: input fields, list rows on hover
--shadow-card	`0 4px 20px rgba(30,9,16,0.10), 0 1px 4px rgba(30,9,16,0.06)`	Standard cards — the double-shadow creates realism
--shadow-md	`0 6px 24px rgba(30,9,16,0.12)`	Floating UI: dropdowns, tooltips, date pickers
--shadow-lg	`0 16px 48px rgba(30,9,16,0.18)`	Modals, drawer panels, full overlays
Button shadow	`0 4px 12px rgba(30,9,16,0.25)`	Primary button resting state
Yellow glow	`0 4px 16px rgba(240,192,48,0.4)`	CTA yellow button only — warm glow effect

Touch Target & Sizing Minimums

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

ELEMENT	MINIMUM SIZE	NOTES
Any button	`44px height`	Mobile touch target minimum per Apple HIG / Material
Icon button	`44×44px`	Always include 8px padding around the icon itself
Input field	`48px height`	Larger than standard for easy tap in clinical settings
Queue row tap area	`60px height`	Staff taps these dozens of times per hour; needs reliability
Avatar circle	`36px` (small), `56px` (card), `80px` (profile)	Three standard sizes only
Token badge	`52×52px`	Must be large enough to read from across a small room

7 ClinicOS-Specific Design Decisions

The Pomegranate Health reference is a consumer health app. ClinicOS is a B2B2C clinic management platform. These adaptations are required to apply the visual language to the ClinicOS context correctly.

DESIGN DECISION	POMEGRANATE REFERENCE	CLINICOS ADAPTATION
Primary audience screen	Consumer mobile app	Staff desktop/tablet dashboard is the primary screen — must work at 1280px+
Data density	Low — one metric per card	Higher — queue rows, patient lists, stats grids are all dense; maintain breathing room within each row

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

DESIGN DECISION	POMEGRANATE REFERENCE	CLINICOS ADAPTATION
Color on status	Used decoratively	Must carry semantic meaning: crimson = active/urgent, yellow = next/warning, teal = done/healthy, gray = waiting
Font size minimum	Consumer: comfortable sizing	Clinic: 14px body minimum — rooms are sometimes dim; screens may be viewed at distance
Button labeling	Brand-focused ("Join Waiting List")	Action-focused ("Issue Token", "Mark Served", "Generate Bill") — clarity over cleverness
Navigation	Single global nav	Role-based portals: Patient / Doctor / Staff / Admin each have their own nav context
Crimson usage	Decorative, brand	Crimson = also emergency/urgent state; use sparingly in non-emergency dashboard contexts to preserve signal value
Animation	Used freely for delight	Limit to transitions < 200ms for queue updates; heavy animations distract staff during patient management

Role-Based Color Accents

Receptionist / Staff
`Crimson gradient`
Portal accent, nav highlight

Doctor
`Teal gradient`
Doctor portal, consultation state

Admin / Analytics
`Lavender gradient`
Admin portal, chart accent

Patient
`Amber gradient`
Patient portal nav, token badge

8 CSS Variables — Developer Export

Explore our developer-friendly HTML to PDF API Printed using PDFCrowd HTML to PDF

Copy this block into your `global.css` or `tailwind.config.js` (as `extend.colors`). All values are exact hex codes extracted from the Pomegranate Health reference and documented in sections above.
